

I, Gilson W. Marcano, am an XM subscriber and American tax payer. I listen to the XM weather channel and the traffic channel as well. I rely on these channels for my business travel, which takes me back and forth across the United States. Without this service I would have a much harder time negotiating heavy traffic, construction zones, and weather related delays. I feel this is one of the major benefits of XM satellite radio, and do not want to see it discontinued. I have many other business affiliates who have utilized these informative and essential channels, and they all agree, Weather and traffic on XM is a value added benefit to all XM subscribers, and it must not be taken away.

Sincerely Yours,  
Gilson W. Marcano
